	<b>Examiner</b> Hugh B. Thompson II	<b>Art Unit</b> 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "*means*" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 6, 9, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1, 6, and 9, there is to be only "one" capital letter, and only at the beginning of the claim.

With respect to claim 9, it appears that the preamble of the claim should be drawn to only the escape system, and the body of the claim can be drawn to the structure of the brake. Claim 10 recites a similar ambiguity. Further it should read "centrifugal brake assembly" so as to be consistent with claim 1 or claim 6.

With respect to claim 10, it appears that the claim should depend from claim 9 and not claim 8. As such, there is no antecedent basis for the abs and brake shoes.

Claims 3 and 8 both depend from claim 1, and they recite the exact same subject matter, as such, one of the claims should be canceled or the scope of the claim changed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Da-Tan et al #4,941,549. Da-Tan et al disclose an escape system comprised of harness 52, cables 21, 41, reel 19, shaft 17, reduction gear assembly 23, 25, 26, 42, brake assembly 20, discs 27, 28, centrifugal member 31, housing 12, and fixing means 34.

***Allowable Subject Matter***

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter is the inclusion of a shaft connecting the central disk and piercing the casing to connect to an external source of rotary motion. The prior art of record fails to teach or suggest the claimed features absent the applicants' own disclosure.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schroemges et al #5,343,981, Devine #4,653,609, Walborn #4,640,388, Sekhar #4,611,688, and Matt #4,602,699 are cited to teach escape assemblies.
